

Puppy Schedule

This is approximately the schedule we have been keeping with the puppies. It is, of course, flexible depending on the activities during the day. Puppies are able to go about two hours at nap time before they will need a bathroom break. Some probably could go longer but they wake up because the others are awake. At night, they are in their pen with the crate door open so they can go to the bathroom when they need to and I can sleep in peace.

- Take them outside as soon as they wake up and give them plenty of time to go to the bathroom. First thing in the morning and last thing at night, they should go pee and poo. Will probably also poop after each meal.
- After a 45-60 min of playtime, they may need a bathroom break outside again. Don't take your eyes off them inside in case they decide to christen your floor.
- Meal times are 7-8 am, 12:30-1:30 pm and 5:30-6:30 pm. Eating dry food soaked with warm water.
- Each time you put the puppy back into its crate, don't forget to use your command for crate.
